

MagniFlo MAGNUM Series

MAGNUM 278

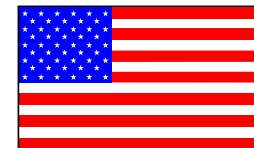

It is extremely important to the performance of the tools that they are located below the paraffin cloud point

Tools are ready to run:
Box and pin, with 8 round E.U.E. threads

MagniFlo MAGNUM Series tools are A.P.I. certified pup joint units designed to be installed at any location in the tubing string, most importantly at the source of the problem. This will allow maximum magnetic treatment where it is needed, not by treating " from the pump up". All units are FULL BORE, and will accept any downhole instruments and implements required for well completion and production.

MAGNUM 278
Tools utilize 2-7/8" tubing pup joints with 2.437" I.D.

MADE IN USA
